WORK EXPERIENCE

Andela, Lagos, Remote — *Software Developer*

August 2017 - PRESENT - Website

I worked on building responsive UIs and architecting various widgets like the modals for an assessment-recording application and a real-time notification system.

Al Jazeera's ContrastVR, Remote — *Freelance Software Developer*

April 2018 - Aug 2018 - Website

Working the the Al Jazeera team, I added new functionality to existing parts and added completely new UI components to the project.

Fireflies.ai, Remote — *Frontend Engineer (Contractor)*

April 2018 - Aug 2018 - Website

I built an ultra-modern landing page and UI components that will be used to work on other parts of their website when I left.

Freelancer, Remote

2015 - PRESENT

I have worked on various freelance projects like an application connecting delivery companies with clients and a website for Al Jazeera's Contrast VR.

PROJECTS

Xplore and Missions — *An open-source blockchain project*

Xplore's GitHub Repo, Mission's GitHub Repo

I made a few pull requests (merged) to this blockchain-based transportation protocol project. I worked on new features and bug fixes on the ReactJS side.

Webtweeps Client — *A web directory of twitter accounts*

View project – GitHub Repo

I built this application which reads a remote markdown file and extracts data from it to be rendered on a page. It was built using Ruby on Rails and React.

Scratchly — *Note Taking App*

View project

An offline-first note-taking app built using ReactJS. I worked on this project to learn a bit more about building offline-first applications.
